**Dear Grower,**

Please find enclosed our new catalogue!

We are delighted to present to you the Schneider youngplants 2022-2023 assortment.

In order to select the world's finest-quality varieties we use our many years of experience, our unique global network and several testing areas and of course your feedback of comments to us. The focus is youngplants of annual, biennial and perennial, both from seedlings and cuttings. This year we have an additional larger plug size for the range of Cyclamen as pot plants and we have extended the kitchen garden herbs offer.

The beauty of our industry is that there is always "a next season". We can select the best breeding available and prepare ourselves for the season ahead. Improvements in breeding is actually enhancing to the greatest potential that which nature already provides us with. Any more than this is out of our hands! The very basis of our business, is to grow plants, so let us enjoy our business and remind ourselves that bringing flowers to the world is a good thing to do!

Nowadays, in life it is important to find the right balance between knowing where our roots originate and how we are connected. At Schneider we practise this in a specific way. We connect you with all the major breeders from around the world, and we make sure that the plants you receive are rooted.

I wish you a good season.

Best regards,

Jacob Schneider, Director

## Schneider supplies you worldwide

Schneider is co-operating with the IAA-Fresh company specialised in long distance transportation. Thanks to their know-how and our unique system of trays and logistic solutions, where ever you are in the world Schneider youngplants is able to supply to you fresh and fast.

IAA-Fresh is a dedicated Air Freight Forwarder' with a wealth of experience in transportation of plants, cuttings, in-vitro material, cut flowers and flower bulbs all over the world.

They have a world-wide network, working together with dedicated, local agents and experts in the transport business. Their warehouses and domestic transportation means are fully monitored and temperature controlled.

For long distance transport we stack the trays of young plants in white polystyrene tray-holders, then we place them carefully in cardboard boxes. Depending on the height of the plants, we use two different sizes of tray-holders: low and high.

Carrier	Tray	Per box	Weight	Example item
Low	288/280	7x280	15kg	Begonia semp.
High	112/110	5x110	13kg	Begonia tub.
Low	288/285	7x285	15kg	Cyclamen
High	128/126	5x126	13kg	Petunia Surfinia
High	288/270	5x270	11kg	Tagetes erecta
Low	405/390	7x390	12kg	Viola corn.

Box dimensions for five trays of trailing petunia young plants stacked in "high" polystyrene tray-holders and subsequently placed in cardboard boxes, ready for despatch.

## Through the year you can find us participating at:

IPM in Germany, Four Oaks & South West Growers in England, Clydeside TS in Scotland, GLAS in Ireland, Flower Trials, Trade Fair and Hortifair in the Netherlands, Wyss Gartentagen in Switzerland, Crocus in Russia, Indagra in Romania.

### IPM

In January we are participating at the IPM in Essen, Germany, which is the world's leading trade fair of horticulture. We will present a selection of our biennials and cyclamen assortment. You are most welcome to visit our stand. For more information and entrance tickets, please ask your sales representative.

### Flower Trials

Block week 24 now! We will display the latest assortment in pot and bedding plants to wholesalers, growers and retailers in the Westland area in the Netherlands.

## Schneider youngplants and Kasteeltuinen Arcen supporting each other

Schneider is working together with Kasteeltuinen Arcen. On this unique location Schneider is testing the large assortment. It is important to see the garden performance of our plants. So in week 24 you can see at the Flower Trials a nice presentation and a few weeks later you can visit Kasteeltuinen Arcen to see the further developments of the plants. For Schneider customers the entrée to those professional gardens is free of charge.

Please feel free to contact us, so we can make an appointment with Kasteeltuinen Arcen.

Primula

## Primula Trials in Heidelberg

In Heidelberg (Germany) and Ewijk (The Netherlands) over 400 varieties of Primula and Viola have been tested over the years. The selections made are based on the valuable independent opinion of the Horticultural Research Station Heidelberg as well as an experienced sales team. As a result Schneider youngplants can offer you a wide range of varieties which fit well together both in terms of plant habit and flowering time.

## Primula Flowering

Please note that the mentioned flowering times in the table below are based on the weather conditions of the Netherlands and Germany. Different weather conditions might have an effect on the flowering time, causing earlier or delayed blooming.
